There is a disposition to hammer the market after the recent advance. With reference to the move ent on the part of the enemies of Erie to keep it from the Stock Exchange, article third of the contion provides for the call of any stock, a registry of which is kept "in some responsible bank, trust company or other satisfactory agency." Arrangements have been made to consolidate the Lake Shore, Michizan Southern, and Toledo and Wabash Railroads. The new company will be known as the Lake Shore and Michigan Southern Railroad Company, and will control 1.500 miles of railroad, reaching from Buffalo to Chicago, and from Buffalo to the Mississippi river at Alton, opposite St. Louis. Negotiations are in progress to form a close nitiance between this company and the Eric Company. One of the features of the proposed compact is an agreement made by the Eric managers to law down a third rail for a narrow gauge track on the whole length of their road between Raifalo and Dunkirk and New York city. This will change the Eric from a broad to a narrow gauge road, and, beside saving the coast of operating the road, will give Eric a close and direct connection with the Union Pacific, with no change of cars between New York and San Francisco.

The instructions of the Assistant Secretary of the Treasury to the Assistant Treasurer here to continue the purchases of bonds and the sales of gold in September, according to the programme of August, led to a strong and buoyant market for governments. It happens that the 1st of September falls Wednesday and the 30th on Thursday. There will therefore be five (extra) purchases of bonds and three sales of gold during the month, the programme of which was posted at the Sub-Treasury to-day, as

million of bonds for the account of the singing fund on alternate Thursdays during the month of September; also the sale of one million gold on alternate Thursdays. In addition to these purchases of bonds for the sinking fund the Treasury will purchase two million of five-twenty bonds each Wednesday during September, to be neld subject to the future action of Congress. This amounts to about \$4,800,000, the larger part of which will be paid in this city. It appears that about \$1,300,000 of this interest was paid last Friday and Saturday in the form of checks payable eptember 1. The total registered interest here is \$2,151,437. The money market was easy at aix per cent, the prevailing rate on call loans, with the usual excep-tions at five and seven. The banks were freely counting short time paper. Much of the apprehension for the ensuing month is removed by the proposed disbursements of the Treasury. The currency to come out in payment for bonds will be about fifteen millions, and the money to go back in payment for gold will be about three and a hair millions. The liquidation of persions will amount to about ten millions. The total Treasury disbursements of currency during September will, therefore, offering money on call and doing a little more in dis

The general duiness extended to the market for Southern securities, in which transactions were quite limited. The new Tennessees were heavy and lower, but the old bonds were strong. The speculation in the gold market favored a decline in the price, owing to the Treasury programme of further gold sales in September, the higher price of our bonds in Europe and the dulness in foreign exchange. the apothecary shop of Dr. Perry, No. 23 Boylston atreet, and there procured of a young lady, the proprietor's daughter, we believe, ten grains of sulphate of morphine, which in a very few moments she swallowed. Now, one-sighth of a grain of this sait is the customary does given by the medical profession to porsons who need it, and of course ten grains would be a tremendous dose, and one very likely to brove speedily fatal. So it would have been with Mrs. Pike had not her condition been early discovered. As a matter of fact, stupidity and other inevitable symptoms shortly exhibited themselves and Dr. Chase was summoned to give relief. He applied the stomach pump and administered anti-doise until the poison had been mostly expelled from the system, when the woman was conveyed by his advice to the City Hospital, she having no friends hore to care for her. At latest accounts she seemed likely to survive the effects of the poison. If she does it will andoubtedy be a disappointment to her, as a bottle of arsente found in her pocket indicates that she was been on suicide.
